## **Re.: Tempur Sealy International, Inc. products including Sterns and Foster**

Tempur Sealy International Inc. (Tempur Sealy) is firmly committed to maintaining a policy that none of the products we sell pose a substantial or unreasonable product hazard or risk of injury to consumers.

All Tempur Sealy products, including Sterns and Foster®, are designed and manufactured with quality, safety and the environment in mind. We meet or exceed applicable European Union, Member State regulations including the EU product Safety Directive and REACH.

Accordingly we perform the appropriate analysis on each raw material and finished product design to ensure that none of them contain a defect that could create a hazard or an unreasonable risk of serious injury for consumers.

Based on our internal policies around raw material selection, quality control during processing, and finished product inspection, Tempur Sealy has no reason to believe that any of our products creates a substantial product hazard for consumers.

(The document is valid one year from today)

Best regards,
